

Contents

The Genesis of the Savannah River Site Key Decisions, 1950 <i>J. Walter Joseph and Cy J. Banick</i>	1
Heavy Water for the Savannah River Site <i>J. W. (Bill) Morris, William P. Bebbington, Robert G. Garvin, Mal C. Schroder, and W. C. Scotten</i>	11
Development of Coextruded Fuel and Target Tubes for the Savannah River Plant Reactors <i>Philip H. Permar</i>	19
High-Performance Uranium-Metal Fuels for Savannah River Reactors <i>William R. McDonell, George R. Caskey, and Carl L. Angerman</i>	23
Aluminum-Lithium Technology and Savannah River's Contribution to Understanding Hydrogen Effects in Metals <i>M. R. (Mac) Louthan, Jr.</i>	31
The Influence of Xenon-135 on Reactor Operation <i>Paul L. Roggenkamp</i>	49
The Nuclear Test Gauge <i>Thomas F. Parkinson and Norman P. Baumann</i>	57
Reactor On-Line Computer Applications <i>Kris L. Gimmy</i>	67
Reactor Safety Management Systems for the Savannah River Reactors <i>Ben C. Rusche</i>	75
Experimental Thermal-Fluids Program In Support of Reactor Operations <i>David Muhlbaier, Sam Mirshak, Vascoe Whatley, and Elwyn Wingo</i>	81
Reactor Program for Increased Production Capability <i>James M. Morrison</i>	91
Reactor Production Diversity <i>James M. Boswell</i>	99
The Restart of L Reactor <i>Thomas C. Gorrell</i>	109

JOSHUA—A Nuclear Reactor Design and Analysis Computational System <i>John W. Stewart</i>	117
Discovery That Nuclear Fission Produces Tritium <i>Edward L. Albenesius, J. Henry Horton, Harold M. Kelley, Daniel S. St. John, and Robert S. Ondrejcin</i>	127
Savannah River Site Canyons—Nimble Behemoths of the Atomic Age <i>LeVerne P. Fernandez</i>	133
Development and Performance of Centrifugal Mixer-Settlers in the Reprocessing of Nuclear Fuel <i>Albert A. Kishbaugh</i>	139
Development of Pu-239 Processes and Facilities <i>Edwin N. Moore, Donald A. Orth, Wally B. Sumner, and James A. Purcell</i>	145
Development of Chemical Processes and Equipment to Recover Curium-244 and Californium-252 <i>Robert M. Harbour, Clark H. Ice, William H. Hale, and John T. Lowe</i>	157
Development and Performance of Processes and Equipment to Recover Neptunium-237 and Plutonium-238 <i>Harold J. Groh, W. Lee Poe, and John A. Porter</i>	165
Production of Pu-238 Oxide Fuel for Space Exploration <i>D. Thomas Rankin, William R. Kanne, Jr., McIntyre R. Louthan, Jr., Dennis F. Bickford, and James W. Congdon</i>	179
Hydrides for Processing and Storing Tritium <i>Theodore Motyka</i>	187
Thermal Cycling Absorption Process—A New Way to Separate Hydrogen Isotopes <i>Myung W. Lee</i>	197
Development of Resistance Welding Methods for Tritium Containment <i>William R. Kanne, Jr. and Robert J. Alexander</i>	201
Evaporation and Storage of Liquid Radioactive Waste <i>Claude B. Goodlett</i>	207
The Defense Waste Processing Facility, from Vision to Reality <i>Chris T. Randall, Lou M. Papouchado, and Sharon L. Marra</i>	213
Savannah River Site Waste Vitrification Projects Initiated Throughout the United States: Disposal and Recycle Options <i>Carol M. Jantzen, Dennis F. Bickford, Kevin G. Brown, Alex D. Cozzi, Connie C. Herman, James C. Marra, David K. Peeler, John B. Pickett, Ray F. Schumacher, Mike E. Smith, John C. Whitehouse, and Jack R. Zamecnik</i>	221

Excellence in Control of Radiation Exposures <i>Kenneth W. Crase</i>	241
Advances in External Dosimetry at the Savannah River Site <i>Dante' W. Wells</i>	247
The Evolution of Internal Dosimetry Bioassay Methods at the Savannah River Site <i>George A. Taylor</i>	253
Environmental Radioactivity On and Near the Savannah River Site Before the Start of Nuclear Operations <i>William C. Reinig</i>	265
High Sensitivity Measurements of Ultra-Low Amounts of Radioactivity in the Environment <i>Albert L. Boni</i>	271
Applied Environmental Technology Development at the Savannah River Site: A Retrospective on the Last Half of the 20th Century <i>Brian B. Looney</i>	285
Role of Microorganisms in the Operation of the Savannah River Site <i>Carl B. Fliermans</i>	295
Lost Lake Found—Restoration of a Carolina Bay Wetland <i>Lynn D. Wike, F. Douglas Martin, and John B. Gladden</i>	303
The Evolution of SRSnet <i>Andrew J. Johnson</i>	311
Sensor and Detector Technology <i>C. Wayne Jenkins</i>	321
Robotics Applications at the Savannah River Site <i>Clyde R. Ward, W. Ivan Lewis, Robert F. Fogle, Paul S. Hebert, Phillip J. French, and Frank M. Heckadorn</i>	329
Future Direction of Science and Technology at SRS <i>Susan Wood</i>	335
